## EVA FERENCZY REICHMANN'S

Ceramic animations are rooted in Ottoman influences. The pieces' delicate projections become calligraphic scrolls and result in fantastic human and animal depictions that step right out of ancient manuscripts and tapestries. Her work re-connects with the rich Hungarian domestic art traditions.

## KONSTANTIN VELITCHKOV

Rendering the invisible visible, Konstantin Velitchkov expresses our feelings, our emotions, our doubts, our thoughts and our moods through the sensuality of the human body, he has participated in numerous shows in Canada, Belgium and Bulgaria.
