...Where learning comes to life!

Where Ecology Meets Geology and Technology

This workshop is offered by Arundel Nature and Science Centre in collaboration with Mining Matters. Teachers will learn about Quebec geology, indigenous plants and how to apply technology outside the classroom to help students better understand their physical environment. Teachers will take part in experiential learning activities integrating geology, ecology and technology. Participating teachers will receive an Earth science teaching kit as well as ready to use classroom resources. The learning and resources provided in this workshop will prepare teachers to help students better understand their outdoor environment.

BYOD – Bring Your Own Device - If you have an iPad, iPhone, cell phone, laptop, USB key, etc. please bring it.

<p>\$ 160.00 Includes: Meals (lunch, dinner, breakfast, lunch) Lodging at ANSC, Mining Matters' Earth science resource materials <i>*Teachers can apply to PIC for workshop funding.</i></p>
